AUSTRALIAN RADIO PUBLICATIONS BEFORE 1950 AN UPDATE.

By Colin MacKinnon
VK2DYM

In the HRSA Newsletter⁽¹⁾ and Amateur Radio magazine⁽²⁾ Chris Long published an article titled "**Australian Radio Journals Before 1939 - A Survey**". I have finally collated my own collection and other data so the following is a brief summary of a comprehensive booklet⁽³⁾ totalling over 60 pages, with updates, additional publications and a few corrections. I have included books published in Australia that might be of interest to collectors and members, but not professional journals, or text books, valve data books etc. as these seem to be readily available and well known. I have concentrated on publications with some technical content and have not included magazines which were purely lists of weekly programs and biographies of radio announcers. I am indebted to Dave Handscomb, VK6ATE, who supplied much of the information on West Australian publications.
