Sold Date: 12/22/2011

Channel: Online Auction

Source: eBay

Category: Tools

This rare radio horn has a silver colored metal base with a tag that says, "Kirkman Engineering Corp New York". The tag has a break in the middle that can be seen in the second picture. The speaker has an overall height of 25" with a bell that is 13" in diameter. The line cord is missing but the driver is good. The speaker is in pretty good shape for its age but does have some spots of paint loss. There are also some bumps on the back of the bell that can be seen in the last picture.
